EDUCATION

MONASH UNIVERSITY

Bachelor of Computer Science (Honours), GPA: 3.625

Monash Graduate Research Scholarship (2023-2024)

Bachelor of Computer Science in Data Science, GPA: 3.625

Monash High Achiever Award (2020-2023)

Coursework: DL, ML, NLP, Software Design, OOP, DSA, Data Science, Database, Big Data

Selangor, Malaysia

July 2023 - June 2024

Oct 2020 - June 2023

SKILLS

Technical

Python, Java, R, SQL, Bash, Spark, Kafka, MongoDB, AWS, Docker, Git

Framework

PyTorch, TensorFlow, Scikit-learn, Tableau, AutoGen, LlamaIndex, Pandas, NumPy

Core Skills

Deep Learning, Data Science, DSA, OOP, Project Management, Stats, Big Data

EXPERIENCE

SMARTJEN (Series A EdTech startup)

Data Science Intern

Singapore, Singapore

Nov 2022 – Feb 2023

- Develop personalized worksheet generation algorithm (95% top-3 similarity), drastically reducing teachers preparation time.
- Conducted exploratory data analysis (EDA) on database to optimize knowledge retention & increase learning performance.
- Engineered end-to-end data pipeline for 200K questions (70 attributes) using NumPy & Pandas for model training.
- Developed and deployed fine-tuned RoBERT models (PyTorch) via AWS Lambda after researching 20+ NLP architectures.
- Collaborate with cross-functional teams to define data-driven solutions, enhancing students' learning outcomes.

DEEP LEARNING RESEARCHER (ML & Cryptography)

Thesis: A General Privacy-Preserving Deep Learning Approach for Encryption

Selangor, Malaysia

July 2023 – July 2024

- Proposed a novel visually meaningful deep-learning encryption scheme which secures AI models using a proper passkey.
- Achieved a 50% adversarial attack success rate on AI-based MRI classifiers, substantially preserving patient data privacy.
- Improve the existing CycleGAN networks by applying key mixing techniques for key diffusion to encrypt the neural network.
- Validated rigorous cryptographic properties: key space, key sensitivity, Kerckhoff's principle, 94% NPCR and 38% UACI.
- Tech & Methodology: Python, PyTorch, TensorFlow, Computer Vision, CNN, GAN, Adversarial Attack, NumPy, Matplotlib.

DEEPBRAIN CHESS ACADEMY

CoFounder & Strategic Advisor

Johor, Malaysia

July 2024 – June 2025

- Led the initial business strategy, scaling operations across 10 partner schools and 200 students in the first six months.
- Architected core business processes and defined the business strategy before transitioning a strategic shareholder role.

PROJECTS

AUTONOMOUS EQUITY RESEARCH AGENT

July 2025

- Developed a multi-agent AI system using AutoGen and RAG (LlamaIndex) to automate comprehensive equity research.
- Leverages LLMs (Llama, Qwen) to analyze financial data against personalized criteria like moat, intrinsic value, competitors.
- Reduced research time from hours to minutes while generating detailed, factually consistent analyst-grade reports.

MDASHHACK HACKATHON - EnergyHub (1st runner up)

Dec 2022

- Secured 1st Runner-Up among 50 teams by leading a 5-member team to build the EnergyHub MVP in Vue.js.
- Engineered core features: P2P energy marketplace, real-time AI monitoring, community battery sharing and web integration.
- Pitched to industry leaders, highlighting our solution's impact on sustainable and decentralized energy adoption.

RESEARCH - Monash IT Student Research Apprenticeship

Feb 2022

- Implemented algorithms using association rule mining and neural networks with 90.27% SOTA accuracy on UCI datasets.
- Assisted in researching, validating results and contributed to research paper writing.

OTHERS

Certifications: MITx Deep Learning w Python, Coursera & Udemy Courses, AWS course, LLM Course, Qiskit Program

Awards: MDashHack Hackathon 2022 (Team Lead, 1st runner up), Malaysia National Chess Championship 2018 (Gold)

Teaching: Class assistant for advanced data structure and algorithms (1 year), tutor for continuous math for CS (1 sem)
